

Jasmina Koprivica, O.D.
120 N. Indian Hill Blvd
Claremont, CA 91711

Dr. Jasmina Koprivica is proud to provide our patients with the most highly advanced technology available in retinal screening today! Our ability to view your internal retinal health is now dramatically improved with the Optomap.

We are concerned about retinal problems such as macular degeneration, glaucoma, retinal holes or detachments and diabetic retinopathy (all of which can lead to partial loss of vision or blindness regardless of age). Additionally, systemic diseases such as diabetes and high blood pressure can be detected during a retinal exam.

EARLY DETECTION OF EYE DISEASE IS CRUCIAL!

Optomap Provides:

An annual eye wellness scan

An in depth view of the retinal layers (where disease can start) The ability to show you your images the day of the eye exam A permanent record for your medical file, which gives your doctor annual comparisons for tracking and diagnosing potential eye disease.

Optomap:

Is fast, easy and comfortable

Will not require dilating drops (which result in blurred vision and sensitivity to light)

Because insurance is designed to cover only a basic eye exam, it does not cover advanced screening tools such as the Optomap. Dr. Koprivica recommends this procedure and will perform the Optomap Eye Scan at an additional cost of \$39 to the basic eye exam.

I have read and understood the above:
